

## Speedliner 1600 AC / DC 2 stages Cleaning / Polishing / Marking

The first stage is for cleaning (AC) with a single or double brush. The Finish Easy Duo system (see reverse) can also be used here. TIG and MIG weld seams are cleaned and passivated quickly and efficiently. The second stage is for high-gloss polishing (DC) with a single or double brush. 100% duty cycle up to a peak power of 100 amperes. Cleaning and high-gloss polishing with electrolyte special. Marking light and dark.

**Speedliner 1600 AC / DC Basic-Set**  
Art.-No.: 100460

Speedliner 1600 AC / DC in the basic set with the necessary equipment to get started right away.  
**Cable extension up to 8 meters working radius possible.**

**Speedliner 1600 AC / DC Power-Pack**  
Art.-No. 100462

Speedliner 1600 AC / DC in a power pack with extensive equipment including a practical Caddy workshop trolley and Finish Easy 1-fold brush with holder.  
**Cable extension up to 8 meters working radius possible.**

## Smartliner 500+ AC Cleaning and Polishing

**Smartliner 500+ AC Basic-Set**  
Art.-No. 100311

Perfect for  
Railing construction  
and  
workshop

Professional cleaning device for the handrail builder and stainless steel processor. Use on construction sites and in the workshop.

## Smartliner 800+ AC Cleaning and Polishing

**Smartliner 800+ AC Basic-Set**  
Art.-No. 100312

Railing construction  
workshop  
Pipeline construction

2-stage professional cleaning device for pipeline and railing construction on construction sites and in the workshop. Use of the Finish Easy Duo system possible.  
**Cable extension up to 8 meters working radius possible.**

## Speedliner Performance 3-stages Cleaning / Polishing / Marking

**Speedliner Performance Power Pack**  
Art.-No. 100562

Clean and polish MIG / MAG and TIG welds. Cleaning of large areas using the Finish-Easy Surface Cleaner (replaces pickling). With an extensive range, including Caddy workshop trolley, Finish-Easy 1-fold, 2-fold and surface cleaner.  
**Cable extension possible up to a working radius of 12 meters.**

## Smartstation XL - The ideal workplace

**Smartstation XL**  
Art.-No. 100520

The **Smartstation XL** is the ideal workplace for professional stainless steel surface processing. You can clean, polish and mark stainless steel components on a work surface of 1150 x 650 mm with the integrated Speedliner 1600 AC / DC cleaning device.

The new, innovative electrolyte feed "iServe" automatically transports electrolyte to the 1 or 2 carbon fiber brush.

The suction with exchangeable activated carbon filter ensures that process vapors are kept away from the user and transported away. Expensive filter cartridges are not necessary.

Thanks to the memory-optimized control, the electrolyte supply and suction start automatically as soon as the button on the handle is pressed. After pressing the button again, the electrolyte supply is stopped and the suction continues for a moment until it also stops.

The liquid fill level can be easily recognized by the transparent canisters (electrolyte, fresh water, waste water).

**Smartstation XXL**  
Art.-No. 100518

The **Smartstation** is also available in an XXL version, with a huge work surface of 2200 x 1000 mm, 2 suction modules, 2 spray devices and the Megaliner Heavy Duty cleaning device. 2 users can clean stainless steel components at the same time.

## Megaliner 3800 Heavy Duty AC / DC Power-Pack

Container construction  
Pipeline construction  
Apparatus construction

Art.-No.: 100456-PP

Powerful cleaning and polishing device for use in container and pipeline construction. With the use of the Surface-Cleaner XXL in conjunction with iServe (see reverse), large areas are cleaned and passivated. This completely replaces the toxic pickling. Up to 2 employees can clean with the Megaliner at the same time. The use of the Finish Easy systems rounds off the equipment that can be used for this device. In DC mode, the gloss level of the surface is determined by means of an adjustable potentiometer from slightly glossy to mirror gloss.  
**Cable extension possible up to a working radius of 12 meters.**
